

SIYAM Test Case Cross-Check Report

Google Doc vs vernon-2 Branch — Group4_SIYAM_TestCase

Generated: August 31, 2026 (UTC) | Branch: vernon-2 @ 8a61289 | Font: Times New Roman 12pt

Executive Summary

This report cross-checks all 133 unique test cases from the Google Doc (9 tabs) against the SIYAM Flutter codebase on the vernon-2 branch. Doc execution status reflects Pass/Fail markings in the document. Implementation status reflects whether the feature exists in code.

Category	Count
Total unique test cases in doc	133
Marked Pass in doc	0
Marked Fail in doc	0
Unmarked in doc (not yet executed)	133
Implementation Ready on vernon-2	132
Implementation Partial	1
Not implemented	0

Bottom line: No test cases are marked Pass or Fail in the Google Doc yet. On vernon-2, 132 of 133 test cases have full implementation support; one case (TC_PROFILE_EDIT_INVALID_ALL) has a partial gap.

Doc Execution Status

Tab	Cases	Pass	Fail	Unmarked
Manager Side Modules	33	0	0	33
Staff Side Modules	31	0	0	31
Donor Side Modules (1)	18	0	0	18
Account Login & Profile Page	13	0	0	13
Account Registration	13	0	0	13
mngr-dntns	10	0	0	10
mngr-audit\&reports	8	0	0	8
Notification Module*	4	0	0	4
mgr staff accs	3	0	0	3

Implementation Status on vernon-2

Ready (132 cases)

Auth, registration, profile, notifications, manager modules (dashboard, suppliers, animals, settings, donations, audit, reports, staff accounts), donor modules, and staff modules (dashboard, inventory, medical, ordering, reports, my activity) are implemented.

Partial (1 case)

Test Case ID	Title	Gap
TC_PROFILE_EDIT_INVALID_ALL	Update Profile with Invalid Input	Phone validation works; first/last name fields have no validators — blank names may save.

Not Implemented (0 cases)

No test case in the document targets a completely missing feature.

Tab-by-Tab Implementation Readiness

Tab	Total	Ready	Partial	Not Implemented
Manager Side Modules	33	33	0	0
Staff Side Modules	31	31	0	0
Donor Side Modules (1)	18	18	0	0
Account Login & Profile Page	13	12	1	0
Account Registration	13	13	0	0
mngr-dntns	10	10	0	0
mngr-audit&reports	8	8	0	0
Notification Module*	4	4	0	0
mgr staff accs	3	3	0	0

Issues Before Manual Testing

1. Test credentials mismatch

The Google Doc uses credentials such as antonlee@manager.siyam / Manager123!. Mock data on vernon-2 uses manager@siyam.test, staff@siyam.test, and donor@siyam.test (all with password password123). Use mock credentials or seed matching Supabase accounts before executing login steps.

2. Doc ID/title mismatches

ID in doc	Issue
TC_ROP_DEFAULT_MGR	ID suggests ROP defaults, but content tests invalid Expiration Warning Window input.
TC_ROP_OVERRIDE_MGR	Title says Item ROP Overrides; description tests ROP default lead time/safety stock.

Both features are implemented in lib/pages/settings_page.dart; follow step descriptions rather than ID labels when executing these two cases.

3. Dependency-only references

These appear as dependencies but have no standalone test table: TC_ALL_LOGIN_AD, TC_ALL_LOGIN_STAFF, TC_ALL_LOGIN_STF, TC_ANIMAL_VIEW_STAFF, TC_MEDLOG_VIEW_STAFF, TC_ORDER_VIEW_STF. Staff has no /animal-records route (manager-only).

4. Intentional design differences

- Manager cannot open inventory from notifications (read-only guidance by design).
- Staff audit (My Activity) has no before/after JSON detail by design.
- Donor drop-off date is optional; picker allows today through +365 days.

Recommended Next Steps

1. Begin manual execution — all 133 cases are currently unmarked in the doc.
2. Start with auth smoke tests using mock credentials.
3. Watch TC_PROFILE_EDIT_INVALID_ALL for possible Fail on blank name fields.
4. Use step descriptions (not ID names) for the two mismatched ROP-related cases.
5. Add first/last name validators on the profile page if a clean Pass is required.

Appendix: Full Test Case Matrix

All 133 unique test cases with document status and verson-2 implementation assessment.

Test Case ID	Title	Doc Status	Impl Status
TC_ALL_LOGIN_BLANK_EMAIL_AD	Log in with Email Field Blank	Unmarked	Ready
TC_ALL_LOGIN_BLANK_PW_AD	Log in with Password Field Blank	Unmarked	Ready
TC_ALL_LOGIN_INVALID_ALL_AD	Log in with All Invalid Inputs	Unmarked	Ready
TC_ALL_LOGIN_INVALID_EMAIL_AD	Log in with Wrong Email but Valid Password	Unmarked	Ready
