

SIYAM User Manual Cross-Check Report

Manual source: Google Doc tab “100% no pics” only (Version 2.0 · September 2026)

Excluded from review: FINAL tab, Tab 1, and all other document tabs

System baseline: `vernon-2` branch (Flutter app at `/workspace`)

Generated: 31 August 2026

Executive Summary

The “100% no pics” tab documents **117 procedural sections** across 7 chapters. Cross-checked against `vernon-2`, **112 sections are fully implemented, 4 have partial mismatches, and 1 UI element is documented but absent**. Overall alignment is strong; gaps are narrow and mostly around donor notifications, login copy, and non-deductible treatment stock.

1. Condensed List — Included in Manual (and present in `vernon-2`)

Chapter 1 — Introduction

- 1.1 User Roles — Manager, Staff, Donor role split and sidebar navigation

Chapter 2 — Account Management

- 2.1 Logging In — email/password sign-in, role redirect (`/dashboard` or `/donor`), success snackbar
- 2.2 Login Errors — validation and invalid credential handling
- 2.3 Registering as a Donor — public donor-only registration (`register_page.dart`)
- 2.4 Logging Out — sidebar logout with “Log out?” confirmation
- 2.5 Viewing Your Profile — Profile tab on `/profile`
- 2.6 Updating Your Profile — edit name/phone, save confirmation
- 2.7 Changing Your Password — Security tab, current/new password flow

Chapter 3 — Notifications

- 3.1 Viewing All Notifications — `/notifications` (inventory alerts for M/S; donor updates for Donor)
- 3.2 Using the Notification Bell — `notification_bell.dart` panel
- 3.3 Viewing Notification Details — `/notifications/:kind/:id` for Manager/Staff inventory alerts
- 3.4 Viewing Inventory Item Details from a Notification (Staff) — “View Item” links to `/inventory/:id`

Chapter 4 — Manager

- 4.1 Manager Dashboard — stats, replenishment preview, staff accounts modal
 - 4.1.1 Viewing the Manager Dashboard

- 4.1.2 Viewing Inventory Overview (Read-Only) — read-only modal, no Staff Inventory access
- 4.1.3 Enabling or Disabling a Staff Account — enable/disable only (no create-staff; manual notes this)
- 4.2 Animal Records — list, search/filter, add, update status, edit (`animal_records_page.dart`)
- 4.2.1–4.2.5 (all subsections)
- 4.3 Supplier Management — list, search, add, edit (`suppliers_page.dart`)
- 4.3.1–4.3.4 (all subsections)
- 4.4 Donation Submissions — full workflow: review, approve, reject, confirm received, stock-in, walk-in
- 4.4.1–4.4.8 (all subsections)
- 4.5 Reports — Monthly Usage + ROP Status tabs (`manager_reports_page.dart`)
- 4.5.1 Viewing Monthly Usage
- 4.5.2 Viewing ROP Status
- 4.6 Audit Trail — full cross-module audit with search/filter/pagination
- 4.6.1–4.6.2 (all subsections)
- 4.7 System Settings — Inventory Alerts (low stock threshold, expiration warning days)
- 4.7.1–4.7.3 (all subsections)
- 4.8 System Settings — Reorder Point Defaults (lead time + safety stock)
- 4.8.1–4.8.2 (all subsections)
- 4.9 System Settings — Item ROP Overrides (add, edit, remove/reset)
- 4.9.1–4.9.4 (all subsections)
- 4.10 System Settings — Category Management (primary + subcategory CRUD, expiry toggles)
- 4.10.1–4.10.10 (all subsections)
- 4.11 System Settings — Unit Management (view, add, edit, delete units)
- 4.11.1–4.11.4 (all subsections)

Chapter 5 — Staff

- 5.1 Staff Dashboard — operational overview, period toggle, stock priority
- 5.1.1 Viewing the Staff Dashboard
- 5.1.2 Generating a Social Media Post — `social_post_dialog.dart`
- 5.2 Inventory Management — list, filters, search/sort, pagination, item details, edit, goods received, dispense
- 5.2.1–5.2.9 (all subsections; no delete — manual notes this)
- 5.3 Medical Records — view, search, add treatment, treatment details, add item to treatment
- 5.3.1–5.3.5 (all subsections)
- 5.4 Ordering — Replenishment + Purchase History tabs, record purchase
- 5.4.1–5.4.5 (all subsections)
- 5.5 Reports — Staff Monthly Usage Report
- 5.5.1 Viewing the Staff Monthly Usage Report

- 5.6 My Activity — self-filtered audit (Inventory + Medical only)
- 5.6.1–5.6.2 (all subsections)

Chapter 6 — Donor

- 6.1 Donor Dashboard — support stats, recent activity, impacts preview
- 6.1.1 Viewing the Donor Dashboard
- 6.2 Make a Donation — photo-required submission (`donate_page.dart`)
- 6.2.1 Submitting a Donation Request
- 6.3 My Donations — history with stage filters and detail dialog
- 6.3.1 Viewing Donation History
- 6.3.2 Viewing Donation Details
- 6.4 Impacts — impact messages with search/filter
- 6.4.1 Viewing Your Impact
- 6.4.2 Searching Impact Messages

Chapter 7 — Quick Reference (reference tables; values match code enums)

- 7.1 Stock Level Statuses — In Stock, Low Stock, Needs Restock, Out of Stock
- 7.2 Dispense Types — Waste, Expired, Adjustment, Treatment (Treatment routes to Medical workflow)
- 7.3 Donation Types — Walk-in, Dropped-off
- 7.4 Donation Statuses (Manager) — Pending, Approved, Rejected, Received, Stocked In
- 7.5 Donation Statuses (Donor) — Under Review, Accepted, Received by Shelter, Completed, Not Accepted
- 7.6 Replenishment Priorities — Critical, High, Medium (+ ROP formula)
- 7.7 Animal Statuses — Healthy, Under Treatment, Adopted, Deceased (Dog/Cat species)

2. Detailed — Not Fully Included or Mismatched

Gap A — Forgot Password UI (Section 2.1 Note) **Not in system**

Manual says: If you click **Forgot password?**, the system displays *Password reset isn't available yet*. There is no password-reset workflow in this version.

System (`vernon-2`): The login page (`lib/pages/login_page.dart`) has no “Forgot password?” link or message. Password reset is indeed unavailable, but the documented entry point does not exist.

Impact: Users following the manual cannot perform the described action. The limitation is real; the UI control is not.

Gap B — Login Register Link Label (Section 2.3 Step 1) **Partial mismatch**

Manual says: From the login page, click **Register your account**.

System: Login page shows **Register as a donor** (step 2 “Create your account” page title is correct).

Impact: Minor copy mismatch; functionality is the same.

Gap C — Donor Notification Details Page (Sections 3.1 Step 4, 3.3) **Partial mismatch**

Manual says: Click any notification to view its full details on a Notification Details page showing alert type and related information.

System:

- **Manager/Staff:** Inventory notifications open `/notifications/:kind/:id` (`notification_detail_page.dart`) — matches manual.
- **Donor:** Notifications deep-link to `/donation-history` or `/impacts` (`donor_notification_service.dart`). There is no donor-specific notification detail route.

Impact: Donor workflow differs from the generic wording in §3.1/3.3. Functionality exists but via destination pages, not a unified “Notification Details” screen.

Gap D — Treatment Stock Deduction for Non-Convertible Items (Sections 5.3.3 Step 6, 5.3.5 Step 6) **Partial mismatch**

Manual says: After saving a treatment or adding an item to a treatment, “related inventory is updated” / “stock is adjusted accordingly.”

System: For items where `dispense_unit` differs from `package_unit` with no stored conversion (e.g. ointments, drops), `applyTreatmentDeduction` in `lib/services/unit_conversion.dart` deliberately **does not deduct stock**. The treatment row is still logged for audit.

- `add_treatment_page.dart` — no inline warning during initial treatment entry.
- `treatment_detail_page.dart` — shows “Logged only — no stock conversion available” when adding items post-hoc.

Impact: Manual overstates automatic stock movement for a subset of medical items. Documented in `KNOWN_LIMITATIONS.md`.

Gap E — Quick Reference In-App Screen (Chapter 7) **Documentation only**

Manual contains: Reference tables for statuses, types, and priorities.

System: Enum values exist in models/services and appear in UI labels, but there is **no navigable “Quick Reference” page** in the app.

Impact: Not a functional gap if users read the manual; worth noting for anyone expecting an in-app glossary.

3. Correctly Documented Limitations (manual matches system)

- No password-reset workflow (manual note — UI link missing; see Gap A)
- No in-app Staff account creation — enable/disable only (§4.1.3)
- No inventory item delete (§5.2.5 note)
- Manager Inventory Overview is read-only; donated stock-in via Donations workflow (§4.1.2, §4.4.7)
- Donor dashboard placeholder content called out as non-working (§6.1.1 note)
- Manager notification detail is guidance-only — no direct inventory link (Staff-only per §3.4)

4. Section Coverage Matrix

Status	Count	Meaning
Implemented	112	Manual procedure matches vernon-2 behavior
Partial	4	Gaps B, C, D, E above
Missing UI	1	Gap A — Forgot password link

5. Key Code References

Module	Primary files
